Ultra-Leather 4x8 Wine Rolling Case

Model : STR2WE

Manufacturer : -

Players who are looking for the best in protection, function, and style need look no further than the Sterling Rolling Case series. Featuring a lightweight core, grafted to a secure molded cap, moisture-resistant lining, and spring-loaded compartments, this case protects the cue like no other. On the exterior, the bottom of the case is protected with our patent-pending in-line skate wheel unit. This piece is tough enough to withstand the baggage handlers and useful enough to make you wonder why no one did it before. We have solved two problems with one piece, portability and sturdiness. Our rolling cases roll easily through crowds and stand up against the wall or on their own. Lean the competition's case against the wall and you will see your cues hitting the floor rather quickly. Other notable features are the heavy-duty rubber sport grips, rivet-reinforced stress points, non-slip shoulder pads, self-healing zippers, heavy duty zipper pulls, self-closing latches, and a jump cue compartment in the lower pocket. The entire case is covered in Ultra-Leather. This upholstery-grade vinyl is indistinguishable from real leather. We challenge you to tell the difference. It is liquid-repellent and wears as good or better than leather. Treat yourself to luxury at an economy price. Retail price: \$159
